About Kryon's Full-Cycle Automation Suite for Contact Centers

Kryon offers contact centers the most comprehensive and user-friendly suite of modular RPA solutions. Kryon Attended Automation empowers CSRs to offer faster, more personal, and more reliable service – while Kryon Unattended Automation allows contact centers to offload entire processes to a virtual workforce. With our innovative Hybrid Automation solution, you can enjoy the full benefits of both attended and unattended robots. Additionally, Kryon Process Discovery™ is the only solution on the market that automatically identifies your most promising automation opportunities, evaluates them, and generates automation workflows – letting you cut your RPA implementation time by up to 80%.
